DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to a rheo-casting container and method of its use.

Group II, claim(s) 10-13, drawn to a process for forming an article.

Group III, claim(s) 14-16, drawn to an injection or shot sleeve.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the casting container and method of its use of Group I (claims 1-9) lack technical features of the process for forming an article (claims 10-13) and the injection/shot sleeve (claims 14-16) of Groups II and III, respectively, as the casting container and method of its use of Group I (claims 1-9) include additional structural details of the container, including a closure member that closes an opening in the container, which are lacking in Groups II and III. Furthermore, Group II (claims 10-13) lacks the technical features of a container supporting portion and a cradle that are present in Group III (claims 14-16). In addition,

Art Unit: 1793

Group III (claims 14-16) lacks the technical feature of a plunger or piston that is operable to inject a charge of semi-solid metal alloy, which is present in Group II (claims 10-13). As a result of the lack of the same or corresponding special technical features, no single general inventive concept exists. Therefore, restriction is appropriate.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
